

SHORT PROFILE

SMART SOLUTIONS FOR FUTURE GENERATIONS

WHAT WE DO

With water, we're in our element

HOLINGER develops innovative and intelligent solutions for present and future generations. Our focus is on all aspects of water; from groundwater management, production and supply of drinking water and urban drainage to wastewater treatment and the restoration of water bodies as well as protection against natural hazards, when it comes to water, we are in our element.

Besides providing water solutions, we also take on the full responsibilities for the associated urban and municipal civil engineering and provide exemplary solutions with respect to the sustainable use of energy and resources. From engineering consulting and project planning to structural engineering, operation and quality control, HOLINGER is your one-stop source of qualified services.

OUR SOLUTIONS ADDRESS THE CHALLENGES OF TOMORROW

- Our **drinking water specialists** develop new methods and processes to secure adequate supplies of quality drinking water that will last for the next 30-50 years.
- Our **wastewater engineers** upgrade wastewater treatment plants with state-of-the-art technologies and processes that will treat wastewater to the highest modern standards within a few years.
- Our **urban drainage experts** pioneer planning tools and develop the integral water protection measures that we implement for our customers.
- Our **hydraulic engineering experts** develop protective measures that guard against the natural hazards of the future and enhance our waters as habitats for nature and mankind.
- Our **civil engineers** plan and realize infrastructure projects that survive generations.
- Our **environmental experts** ensure the sustainable use of our resources, efficient waste management and healthy indoor air.

YOU CAN COUNT ON US

We offer real added value

HOLINGER is a dedicated and reliable partner for customers and business partners. Working with us is straightforward and our relationships are based on mutual trust. No matter what challenge you face, we will find the right solution that creates real added value. We will understand all your needs, provide you with the right expertise for each task and, thanks to our interdisciplinary cooperation, we will ensure well-founded, smart and visionary projects that also make economic sense.

Always one step ahead

HOLINGER always aims to be one step ahead. We invest a significant part of our annual sales in research and development in order to make the latest technologies and processes available to our customers.

Near you

We are close to our customers and projects. With over 20 locations in Switzerland and 9 in Germany and Luxembourg, we offer our customers the benefits of a strong regional presence. At the same time, every project is backed by the know-how of the whole HOLINGER organisation.

WHO WE ARE

From pioneer to a leader

Since our founding in 1933, HOLINGER has been one of the pioneers in the field of water protection planning and implementation in Switzerland. Today, HOLINGER is one of the leading European providers of comprehensive engineering services in the water and environmental sector with sales of around CHF 60 million. Around 430 employees in Switzerland and 70 in Germany and Luxembourg work on 2000 projects in about 20 countries.

Latest know-how

Continuous education and training is a top priority at HOLINGER. At the HOLINGER Academy, we develop and transfer know-how in project management and in our various fields of expertise, promoting the exchange of experience across all locations and specialist fields. In order to meet the high demands in the long term, we train apprentices and emphasise vocational training for all employees.

High quality, sustainability, independence

We work using a project-specific integral management system based on the ISO 9001:2015 quality management standard. In 2020, we also received the "EcoEntreprise Excellence" certificate for sustainable and socially responsible corporate management. Furthermore, we regularly review our customer satisfaction and take corrective action whenever necessary. Our environmental and social performance is documented in our Sustainability Report. As a specialized engineering service provider, our sole commitment is to solving your task, irrespective of manufacturer or supplier interests.

Responsible employer, committed employees

Employees are HOLINGER's true capital. Everyone takes responsibility for their actions and contributes to the success of the company with their performance and knowledge. All HOLINGER's share capital is in the hands of our active employees. Everyone has the opportunity to participate in the company and its success. This results in strong identification with the company and high levels of commitment and motivation among our employees. HOLINGER promotes modern working models and pays attention to a good work-life balance. Occupational health and safety protection have a high priority and are based on SUVA* specifications. At HOLINGER, men and women are paid equally. We ensure that there is no gender pay gap through regular inspections by an external review body.

* SUVA = Swiss National Accident Insurance Fund

*"No matter what challenge you face,
we will find the right solution that
creates real added value."*
